3 MS. BAILEY: Good evening, my name is Mary  
4 Bailey, and I have lived here since 1982. And of  
5 course, I'm not for this radiation coming all over the  
6 place. I was going to give a talk, but I get kind of  
7 losing my voice with perfume, and so I would like to  
8 say one thing. I have a great love for the aquifer.  
9 To me, it's a national treasure. And I don't think  
10 that people should have the right to make it their  
11 trash heap. I understand, if I'm wrong, tell me, that  
12 ultimately things will end up over in Death Valley, and  
13 that our aquifer would be gone. And personally, I feel  
14 really bad about that. A lot of other things too, but  
15 did want to mention that. Thank you.
